To whom it may concern:

It has been brought to my attention that an effort is being made to limit the amount of information that can be broadcast over the XM radio. We are the owners of a trucking company and our drivers use their XM radio to get information helpful to them. It becomes a safety issue if our drivers have to search for a local radio station to get the information they need. With the XM radio the station never fades out, so the driver is not required to take his attention away from his driving to fumble with radio channels. We pay for our XM service, so why would we not be allowed to have all the benefits they can offer us. We urge you to reject the NAB's petition 04-160.

Sincerely
Lois A. Biel
